**M. O. P. VAISHNAV COLLEGE FOR WOMEN (AUTONOMOUS)**  
Chennai - 600 034, India.

### Rationale for Calculation

1. **Average Footfall per Day =**

Total Number of Library Users / No. of Working Days

2. **Average Digital Resources Usage Per Day =**

Total Number of Pages Views / Total Number of Days

- a) For digital resource usage, students are given remote access, and so can access these resources at any time. Hence, total number of days is used instead of no. of working days
- b) Number of page views is considered as an indicator of digital usage, as students were initially allotted a common single login id and password for accessing NLIST resources. Subsequently, individual ids were created, but students still had the option of using the common login id. Therefore, multiple students have accessed NLIST during the specified period with a common login id. Due to this, the number of page views is considered a more accurate indicator of digital usage than the number of user ids recorded.

3. **Average Number of Library Users Per Day =**

Average Footfall Per Day + Average Digital Resources Usage Per Day

4. **Percentage Of Library Users Per Day =**

[Average Number Of Library Users Per Day/ (Total Number Of Students + Total Number Of Faculty)] X 100
