Educational leadership is the essential ingredient needed to improve the quality of education and the education system itself, especially in the aftermath of the pandemic. In the midst of all disruptions, educational institutions are looking for more ways to improve their system and provide the best possible education to the students. To fulfil this goal and provide excellence in education, there needs to be visionary leadership at every level in an education institution. In this context, the SICCI is planning on organizing a **National Educational Leadership Conference** in the month of **February 2022**. This Conference seeks to bring together the decision makers and executives from Education Sector to share their experiences and best practices in all aspects of Educational Leadership. We would also be working closely with the Government in this regard.

To take this project forward, we are forming a core-committee with **Dr. Thangam Meganathan**, (Chairperson, Rajalakshmi institutions and Chair, SICCI Education Committee) as the head of this committee. We request you to kindly join this core committee and help us drive this strategic initiative.

We look forward for your continued support.

**REPORT – NONRELIGION IN A COMPLEX FUTURE PROJECT (UNIVERSITY  
OF OTTAWA)**

University of Ottawa grants undergraduate and graduate students an opportunity to work as Visiting Student Researchers (VSR) on different research projects. Due to the COVID-19 pandemic, the opportunity was converted into a Virtual Student Researcher (VSR). One such project is the Nonreligion in a Complex Future (NCF) project by the Faculty of Arts, specifically the Death and Dying Project headed by Dr. Lori Beaman. The internship period was from 1<sup>st</sup> September, 2021 – 26<sup>th</sup> August, 2022.

Prior to the start of the internship period, Ms. Emma Robinson, Project manager, would get on a call for the interns to get familiarized with the project. She encouraged the interns to take part in the project meetings to understand how things work till the internship started.

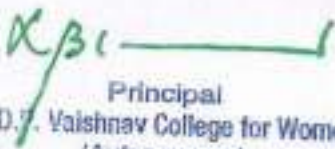

This is one of the most fruitful experiences possible, as far as research work is concerned. Despite being from a different field (Sociology), the project allows for work in an interdisciplinary field with Psychology. Work in the Death and Dying project mainly entailed working on the Obituaries and Death Notices of different Canadian newspapers that have been published during the 20<sup>th</sup> and 21<sup>st</sup> century (1900-Present).

The first task was given by Mr. Zachary Munro, to collect Obituaries and Death Notices from various newspapers of different provinces of Canada (viz. Toronto Star, The Globe and Mail, The Vancouver Sun, Calgary Herald). During this, working with various websites and sources of newspaper archives was familiarized.

After collecting each newspaper, a count of the number of obituaries, death notices and 'lives lived' notices in each file was collected. This enabled the differentiation between an obituary and a death notice.

Reading through these newspapers gave way for understanding how each decade had a certain language to be followed. People's thoughts about death shifted from decade to decade. It also made clear the ways in which religion influences people in multiple ways viz. language, views toward death. Obituaries and death notices were then coded based on certain factors viz. work, religious affiliation, etc.

Thanks to this coding work, the level of detail that goes into research data collection and analysis came to light. This project emphasizes the importance of a learning curve and the importance of having supportive team members and supervisors as you work your way through that learning curve.

To quote my supervisor, Dr. Chris Miller, "it's very important to play devil's advocate during discussions. It helps you see what you've been missing so far, and what you could do better." (A response to my query about a particular topic in the coding framework)

Apart from this, there were regularly scheduled official meetings with the entire team that really emphasized the importance of teamwork. During these meetings, no one could possibly ask a 'wrong' question - it was always considered to be a question that hadn't been looked at yet. The only questions that weren't addressed were the ones that weren't asked. There was always a level of comfort associated with these meetings that made me excited for the next meeting, even if it meant staying up till midnight (due to time zone differences).

I could not be more thankful for having been given such a wonderful gateway to the world of research. I'm immensely grateful for having very understanding and supportive supervisors like Dr. Lori Beaman, Ms. Emma Robinson, Ms. Hannah McKillop, Mr. Zachary Munro and Dr. Chris Miller for giving me prompt and valuable guidance through the course of this project and for always being very understanding of my queries and requirements.

INTERNSHIP REPORT

VIRTUAL RESEARCH INTERNSHIP AT UNIVERSITY OF OTTAWA

Name of Student: Archana Selvarasa

Register Number: 200721064001

The internship opportunity at University of Ottawa (Ottawa, Canada) was that of a research internship done for a total duration of 6 months (total of 345 hours). During my time period as a 'Virtual Student Researcher' (VSR), my main work was associated with the Non-religion in a Complex Future (NCF) project, the Principal Investigator of which is Dr. Lori G. Beaman, my main supervisor. Under the NCF project I was assigned to work on the sub-project titled 'Death and Dying'.

By doing this internship, apart from gaining valuable experience in research studies, I am glad to have had great exposure to discuss and work with knowledgeable scholars, writers, historians and sociologists from around the world. My everyday tasks were mostly limited and simple, and that gave me insight into how research is an unexcited and patient process. This being the case, I have gained a good foundation in 'data collection', 'data segregation & analysis' and 'data coding'. The various tasks I worked on during this internship are:

- An initial task of the internship, assigned by my sub-supervisor Mr. Zachary Moore, was to collect obituaries and death notices for the time period 1900 – present from various Canadian newspaper archives such as the Toronto Star, The Vancouver Sun, Calgary Herald & The Globe and Mail. This task covered the major part of data collection and taught me the ways of data handling and segregation.
- After working on data collection for a significant amount of time, a 'sample counting' task was assigned, which involved counting the frequencies of the collected samples for a given time, i.e., counting the number of obituaries and death notices appearing in each newspaper for each decade every 5 years. Working on this task guided by my supervisors, helped me learn about differentiating the data in terms of their structure, writing style, religious affirmations of the member, area behind the write-up, personality influences and other factors.
- Towards the last part of the internship, I worked on coding the various data obtained. Coding of obituaries and death notices was done based on several factors such as religious beliefs, family members, career of the person, their personality and many more.

Having gotten this internship opportunity at University of Ottawa, it has provided me with some research and career knowledge about the field of psychology and sociology, it has enabled me to learn about the history, evolution and differentiation of Obituaries and Death notices, and it has enriched in me knowledge about efficient data collection, segregation and data coding. I am grateful to Dr. Lori G. Beaman, Mr. Zachary Moore, Ms. Emma Robinson and my college professors for the opportunity and for guiding me through every step.

It was wonderful to meet with you today and I'm thrilled and grateful to begin interning at your paper! I'm looking forward to working with you and the rest of the team.

Looking forward to learning and working at your paper! Please let me know if there is any paperwork or additional information you need from me beforehand, or if there is any documentation I should bring along on my first day.

Again, thank you so much for this opportunity.
