1. **Average Footfall per Day** = Total Number Of Library Users / No. Of Working Days
2. **Average Digital Resources Usage Per Day** = Total Number Of Pages Views / Total Number Of Days
3. (**Rationale** – for digital resource usage, students are given remote access, and so can access at any time. Hence, total number of days is used instead of no. of working days)
4. **Average Number Of Library Users Per Day** = Average Footfall Per Day + Average Digital Resources Usage Per Day
5. **Percentage Of Library Users Per Day** = [Average Number Of Library Users Per Day/ (Total Number Of Students + Total Number Of Faculty)] X 100
