10:00 am	Workshop	Graph Colorings	Dr. A. Shanthakumari Assistant Professor, Department of Mathematics, Presidency College (Autonomous), Chennai-600005.

Objective of the Programme:

To expose students to Graph Colorings, a most sought-after area of research in mathematics and its significance in providing solutions to real-life situations.

Programme brief :

The session began with Dr. A..Shanthakumari briefing on, introduction to Graph Theory and some basic terminologies, such as vertices and edges. The history behind the foundation of Graph Theory, laid by Leonard Euler from the Konigsberg Bridge Problem and different types of graphs such as Planar graphs, Eulerian graphs etc were explained. Mam also briefed on Four Color Theorem, edge coloring, vertex coloring and elaborated on chromatic numbers, chromatic indices and topological indices. Various applications of graph colorings, such as map colouring, time overlap in flight arrival, scheduling of exams, sudoku puzzles, network and chemistry, and the corresponding way in which the Four Color Theorem was used were explained. Further, concepts like Conflict Graphs, directed and undirected graphs and Chemical Graph Theory, were discussed.
This enlightening session ended with an overview of concepts grasped.

Programme Outcomes:

- It was a very insightful session that drew the undivided attention of students to a relatively new field of mathematics.
- The session provided a holistic knowledge of a topic that holds applications in various fields of the contemporary world.
- Students were able to understand the importance of graph coloring ideas, its various areas of applications and use it for their future research.

Objectives of the Programme:

- To provide an understanding of the various challenges and the opportunities in working as a Wildlife Photographer.
- To make students understand the skill sets required, the important gears/essentials to carry while shooting in the wild, tips on how to plan a Photoshoot in various circumstances.
- To provide insights on the scope and opportunities in the field of Wildlife Photography

Programme Brief:

Mr. K Narasimhan started off by giving us an introduction about his own work, and how he co-founded 'SALTREE', a fine art print company. He continued to talk about his experiences in photographing animals in their moments and how his way of taking wildlife photographs and subjects changed gradually over the years. He then went on to explain what made them pleasing to look at and told us how he encountered various challenges whilst preparing to shoot those pictures. He emphasized on the importance of composition, importance of color, editing and processing of photographs. Narasimhan sir passionately spoke about the natural behaviors of animals and how he witnessed animals hunting each other. He also narrated about his time overseas in many countries. While answering questions from students, he spoke about what inspired his company, and how he tried to adapt to commercial shoots after being quite used to photographing nature. He also informed us of the softwares he uses for post processing. He concluded the session by encouraging students to explore and frame wildlife photography in the form of art and not just simple animal photographs, urging students to observe patterns and shapes and examine as many classical paintings as possible to get a natural flow of creativity.

Programme Outcomes:

- Analysed and understood the impact of aspects like lighting, framing, composition, equipment/gear handling, timing and post processing that are necessary to capture favorable photographs.
- Assessed the importance of having knowledge about polarizers and ND filters to achieve quality pictures.
- Get familiarized with the various opportunities available in WildLife Photography.
